

Philippine Green Building Council NATIONAL CONVENTION

17-21 November 2017 | Manila, Philippines

Message from the President Solid Waste Management Association of the Philippines

Greetings and Mabuhay!

Congratulations to the Philippine Green Building Council for holding the Philippine Green Building Convention 2017 and for hosting the World Green Building Council Asia-Pacific Network Meeting.

In this age of global warming and climate change, where most structures, particularly buildings emit heat and at the same time absorb heat it is imperative now that green buildings should be used in order to promote a sustainable lifestyle. Indeed, unsustainable lifestyles such as living in heat-absorbing/emitting buildings only help to exacerbate warming in cities and contribute to global warming.

This conference would indeed be a great venue for all of us to learn more about green and sustainable buildings and help further by promoting such strategies.

Salute!

GRACE P. SAPUAY

President

Solid Waste Management Association of the Philippines
