

Philippine Green Building Council NATIONAL CONVENTION

17-21 November 2017 | Manila, Philippines

Message from the Founding Chairman Worldbex Services International

We at Worldbex Services International believe that it is our duty to our country and the people as institutions of development to be instruments of positive change. In this regard, we take pride in championing the grave importance of acquainting the Philippine construction and design industry with ethical and environmentally conscious building practices through our annual construction and design trade shows (WORLDDEX, PHILBEX Cebu, PHILBEX Davao).

As a leading events and expositions organizer, we have constantly applied this philosophy in praxis as we highlight product and service innovations that embody the essence of green building as much as we strive to open the dialogue on the relevance of sustainability. Most importantly, our commitment to preserving the environment meant establishing an alliance with fellow organizations that have fully dedicated their talents and efforts in this cause.

Admirable in every way, we have long believed in the advocacy of the Philippine Green Building Council (PHILGBC) who have, for the past decade, spearheaded the country's plight towards a greener future through innovative and dynamic initiatives. As such, we could not be more honored to express our support as PHILGBC undertakes the duty of facilitating the largest gathering of green building leaders at the upcoming 2017 PHILGBC National Convention.

With the Philippines appointed as host for the World Green Building Council-Asia Pacific Regional Network Meeting, this year's PHILGBC National Convention is expected to be a groundbreaking event that shall witness the boldest convergence of knowledge and expertise in green building. From a series of "Building Green" events such as the Green Building Tour; the CEO Breakfast Forum; and the Building Green Conference 2017 to the unveiling of the BERDE 2.0 and the organization's much anticipated Anniversary Gala, no less than a momentous and incredibly insightful experience awaits professionals of the industry who are seeking to gain a global perspective on relevant issues, establish new connections, as well as obtain cutting-edge practices that will make for a better and healthier world.

At this point, we would like to congratulate PHILGBC as it marks its 10 years of advocacy in action. In our mutual pursuit to preserve and nurture the environment by ceaselessly promoting and embodying green practices in building, PHILGBC may rest assured that WSI will remain committed in our support to your organization!

JOSEPH ANG
